DETAILED ACTION

Allowable Subject Matter

1. Claims 1-33 are allowed.
2. The following is an examiner's statement of reasons for allowance: A sensor for detecting a substance in a liquid, said sensor comprising at least one of said wires being integrated in said pillar shaped primary substrate such that a distance between the integrated wire and the uppermost surface of the primary substrate differs along the length of the wire, or a communication line for applying a voltage over said detector, at least part of said communication line being integrated in said pillar shaped primary substrate so as to extend from said upper end to said lower end, in combination with all other limitations of the independent claims, is not disclosed nor deemed obvious in view of the prior art of record. The closest prior art reference is de Charmoy Grey et al. (U.S. Patent Number 6,575,020), which lacks the specific limitations for the integrated wire or communication line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner has cited references deemed to be relevant to the general state of the art of the present invention.
